

**Sequence of activities to develop reasoning about comparing groups with boxplots.**

<i>Milestones: Ideas and Concepts</i>	<i>Suggested Activities</i>
<b>INFORMAL IDEAS OF COMPARING GROUPS</b>	
<ul style="list-style-type: none"> <li>• Informal comparisons of dot plots and histograms.</li> </ul>	<ul style="list-style-type: none"> <li>• Activities in Lessons 1 and 2 of the Distribution Unit</li> </ul>
<ul style="list-style-type: none"> <li>• Comparison of graphs to determine which has a higher and lower standard deviation.</li> </ul>	<ul style="list-style-type: none"> <li>• What Makes the Standard Deviation Larger or Smaller Activity? (Lesson 2, Variability Unit)</li> </ul>
<b>FORMAL IDEAS OF COMPARING GROUPS WITH BOXPLOTS</b>	
<ul style="list-style-type: none"> <li>• Data as an aggregate rather than points and slices when comparing groups.</li> </ul>	<ul style="list-style-type: none"> <li>• How Many Raisins in a Box Activity (Lesson 1: “Understanding Boxplots”)</li> </ul>
<ul style="list-style-type: none"> <li>• How a boxplot represents a data set, how points are “hidden” in a boxplot.</li> </ul>	<ul style="list-style-type: none"> <li>• How Many Raisins in a Box Activity (Lesson 1)</li> </ul>
<ul style="list-style-type: none"> <li>• Coordination of comparisons of center and spread in comparing groups.</li> </ul>	<ul style="list-style-type: none"> <li>• Gummy Bears Activity (Lesson 2: “Comparing Groups with Boxplots”)</li> </ul>
<ul style="list-style-type: none"> <li>• How variability between and within groups are used in comparing groups.</li> </ul>	<ul style="list-style-type: none"> <li>• Gummy Bears Activity (Lesson 2)</li> </ul>
<ul style="list-style-type: none"> <li>• Advantages of using boxplots to compare groups.</li> </ul>	<ul style="list-style-type: none"> <li>• Comparing Boxplots Activity (Lesson 2)</li> </ul>
<ul style="list-style-type: none"> <li>• How to make informal inferences from comparisons of samples of data using boxplots.</li> </ul>	<ul style="list-style-type: none"> <li>• Interpreting Boxplots Activity (Lesson 3: “Reasoning about Boxplots”)</li> </ul>
<ul style="list-style-type: none"> <li>• Understanding how features of data are revealed in different graphs of the same data.</li> </ul>	<ul style="list-style-type: none"> <li>• Matching Histograms to Boxplots Activity (Lesson 3)</li> </ul>
<ul style="list-style-type: none"> <li>• Integrating reasoning about shape, center and spread in different graphical representations.</li> </ul>	<ul style="list-style-type: none"> <li>• How do Students Spend Their Time Activity (Lesson 4: “Comparing Groups with Histograms, Boxplots, and Statistics”)</li> </ul>
<b>REVISITING THE IDEA OF COMPARING GROUPS IN SUBSEQUENT UNITS</b>	
<ul style="list-style-type: none"> <li>• Variability between and within groups when making formal inferences involving two samples of data.</li> </ul>	<ul style="list-style-type: none"> <li>• Gummy Bears Revisited Activity (Lesson 4, Statistical Inference Unit)</li> </ul>
