

**Sequence of activities to develop reasoning about statistical inference.**

<i>Milestones: Ideas and Concepts</i>	<i>Suggested Activities</i>
<b>INFORMAL IDEAS PRIOR TO FORMAL STUDY OF STATISTICAL INFERENCE</b>	
<ul style="list-style-type: none"> <li>• Making inferences and generalizations from a sample of simulated data.</li> </ul>	<ul style="list-style-type: none"> <li>• One Son Activity, (Lesson 1, Statistical Models and Modeling Unit)</li> </ul>
<ul style="list-style-type: none"> <li>• Statistical inference as an argument.</li> </ul>	<ul style="list-style-type: none"> <li>❖ An informal discussion early in a course about the nature of statistical inference, and comparing this to making an argument and providing evidence to support your claim. (The symbol ❖ indicates that this activity is not included in these lessons.)</li> </ul>
<ul style="list-style-type: none"> <li>• Random sample and how it is representative of a population.</li> </ul>	<ul style="list-style-type: none"> <li>• The Gettysburg Address Activity (Lesson 3, Data Unit)</li> </ul>
<ul style="list-style-type: none"> <li>• Results being due to chance or due to design (some other factor).</li> </ul>	<ul style="list-style-type: none"> <li>• Taste Test Activity (Lesson 4, Data Unit)</li> </ul>
<ul style="list-style-type: none"> <li>• As a sample grows the characteristics become more stable, that with more data you can better generalize to a population.</li> </ul>	<ul style="list-style-type: none"> <li>• Growing a Distribution Activity (Lesson 1, Distribution Unit)</li> </ul>
<ul style="list-style-type: none"> <li>• Two samples of data may or may not represent true differences in the population.</li> </ul>	<ul style="list-style-type: none"> <li>• Activities in Lessons 1, 2, 3 and 4, Comparing Groups Unit)</li> </ul>
<ul style="list-style-type: none"> <li>• When comparing groups, you must take into account the variability between groups relative to the variability with each group.</li> </ul>	<ul style="list-style-type: none"> <li>• Gummy Bears Activity, Lesson 2, Comparing Groups Unit)</li> </ul>
<ul style="list-style-type: none"> <li>• If the normal distribution provides a good model for a data set we may make inferences based on the Empirical Rule.</li> </ul>	<ul style="list-style-type: none"> <li>• Normal Distribution Applications Activity, (Lesson 3, Statistical Models and Modeling Unit)</li> </ul>
<ul style="list-style-type: none"> <li>• We can make inferences by comparing a sample statistic to a distribution of samples based on a particular hypothesis.</li> </ul>	<ul style="list-style-type: none"> <li>• Activities in Lessons 1 and 2, Samples and Sampling Unit</li> </ul>
<b>FORMAL IDEAS OF STATISTICAL INFERENCE</b>	
<ul style="list-style-type: none"> <li>• Hypothesis test as making an argument.</li> </ul>	<ul style="list-style-type: none"> <li>• Modeling Coin Tosses Activity (Lesson 1: “Testing Statistical Hypotheses”)</li> </ul>
<ul style="list-style-type: none"> <li>• Hypothesis test, null and alternative hypothesis</li> </ul>	<ul style="list-style-type: none"> <li>• Balancing Coins Activity (Lesson 1)</li> </ul>
<ul style="list-style-type: none"> <li>• The idea of a <math>P</math>-value.</li> </ul>	<ul style="list-style-type: none"> <li>• <math>P</math>-values Activity (Lesson 2)</li> </ul>
<ul style="list-style-type: none"> <li>• Types of errors and correct decisions.</li> </ul>	<ul style="list-style-type: none"> <li>• Types of Errors Activity (Lesson 2)</li> </ul>
<ul style="list-style-type: none"> <li>• What is needed to test a hypothesis?</li> </ul>	<ul style="list-style-type: none"> <li>• Types of Errors and <math>P</math>-values</li> </ul>

	Activities, (Lesson 2)
<ul style="list-style-type: none"> <li>Confidence interval as an estimate of parameter, with margin of error.</li> </ul>	<ul style="list-style-type: none"> <li>Introduction to Confidence Intervals (Lesson 2)</li> </ul>
<ul style="list-style-type: none"> <li>Understanding how confidence intervals may be presented in different ways.</li> </ul>	<ul style="list-style-type: none"> <li>Introduction to Confidence Intervals (Lesson 2)</li> </ul>
<ul style="list-style-type: none"> <li>Understanding what the 95 percent refers to in a confidence interval.</li> </ul>	<ul style="list-style-type: none"> <li>Estimating with Confidence, Estimating Word Lengths, and What Does the 95% Mean Activities (Lesson 3: “Reasoning about Confidence Intervals”)</li> </ul>
<ul style="list-style-type: none"> <li>A statistically significant difference between two groups where randomization of conditions has taken place</li> </ul>	<ul style="list-style-type: none"> <li>Gummy Bears Revisited Activity (Lesson 4: “Using Inference in an Experiment”)</li> </ul>
BUILDING ON FORMAL IDEAS OF STATISTICAL INFERENCE IN SUBSEQUENT TOPICS	
<ul style="list-style-type: none"> <li>Statistically significant correlation coefficient.</li> </ul>	<ul style="list-style-type: none"> <li>Activities in Lesson 3, Covariation Unit</li> </ul>
<ul style="list-style-type: none"> <li>Statistically significant regression slope.</li> </ul>	<ul style="list-style-type: none"> <li>Activities in Lesson 3, Covariation Unit</li> </ul>
<ul style="list-style-type: none"> <li>There are many types of statistical inferences, and software may be used by correctly choosing the commands.</li> </ul>	<ul style="list-style-type: none"> <li>Research Questions Involving Statistical Methods Activity (Lesson 5: “Applying Methods of Statistical Inference”)</li> </ul>
<ul style="list-style-type: none"> <li>Understanding that the interpretation of <math>P</math>-values and confidence depends on assumptions being met.</li> </ul>	<ul style="list-style-type: none"> <li>Research Questions Involving Statistical Methods Activity, (Lesson 5)</li> </ul>
